Hi,

I am forwarding an email from a resident within the Eastside neighborhood in support of the no wake zone with his permission.

Subject: No wake zone

For discussion on the no wake zone, I am convinced that nearly all the damage was and is being caused by very few but large cruisers. They create waves over 2 feet high and even when the river is at flood stage, they make no effort to curtail their wakes. I had to pay \$2,000.00 last year for rip wrap rocks to repair only part of the damages. I do all the labor myself. I think we should have a low wake zone if that is possible and if not, then a no wake zone.

Thank you for your consideration. Great
